Title and Description

Resource

avoidant p. (disorder)

[DSM-IV] [DSM-IV] a personality disorder characterized by social discomfort, hypersensitivity to criticism, low self-esteem, and an aversion to activities that involve significant interpersonal contact; there is a proclivity to anxiety, an exaggeration of difficulties, a desire for affection and acceptance that is restrained for fear of rejection, and an avoidance of risks or new activities for fear of embarrassment.

Dictionary

tenosynovitis

a gouty affection of the tendons.

Dictionary

Promoting Optimal Development: Newborns and Infants: Merck Manual Home Edition

If their physical needs are met regularly and consistently, infants quickly learn that their caretaker is a source of satisfaction, creating a firm bond of trust and attachment. In addition to their physical needs, babies need affection and stimulation to develop emotionally and intellectually. Some parents provide a highly organized, structured environment for their infant using a variety of toys and gadgets.

1. The act of affecting or acting upon; the state of being affected.
2. An attribute; a quality or property; a condition; a bodily state; as, figure, weight, etc., are affections of bodies. "The affections of quantity." "And, truly, waking dreams were, more or less, An old and strange affection of the house." (Tennyson)
3. Bent of mind; a feeling or natural impulse or natural impulse acting upon and swaying the mind; any emotion; as, the benevolent affections, esteem, gratitude, etc.; the malevolent affections, hatred, envy, etc.; inclination; disposition; propensity; tendency. "Affection is applicable to an unpleasant as well as a pleasant state of the mind, when impressed by any object or quality." (Cogan)
4. A settled good will; kind feeling; love; zealous or tender attachment; often in the pl. Formerly followed by to, but now more generally by for or towards; as, filial, social, or conjugal affections; to have an affection for or towards children. "All his affections are set on his own country." (Macaulay)
5. Prejudice; bias.
6. <medicine> Disease; morbid symptom; malady; as, a pulmonary affection.
7. The lively representation of any emotion.
8. Affectation. "Spruce affection."
9. Passion; violent emotion. "Most wretched man, That to affections does the bridle lend." (Spenser)

Synonym: Attachment, passion, tenderness, fondness, kindness, love, good will. See Attachment, Disease.

Origin: F. Affection, L. Affectio, fr. Afficere. See Affect.
